### Recent Project Highlights and Key Skills:

- **AJAX HMVC Application:** Compliance and training application that was created from scratch with the HMVC framework. Utilizing the latest jQuery techniques for animations, modals, and timers. Extended the framework classes for additional functionality within the application.
- **Business Analysis:** Interact with customers to identify application requirements and enhancements to meet requirements. Quickly design process flow and documentation for development cycle.
- **Highly Dependable Application:** Developed and maintained a CRM for a \$50 Million dollar a year company with millions of leads and hundreds of thousands of clients. Optimized for a multi-location and private labeled offerings, customizing centralized document management and payment gateways.
- **Project Management:** Extensive experience in creating, designing, and balancing multiple projects. Execute project work as appropriate to meet changing needs and requirements.
- **Management:** Manages resources within a budget and project schedule.
